Inspection Chart	Page 7

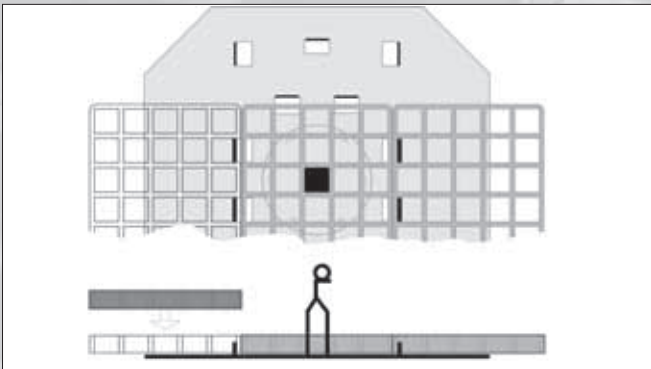

Procedure

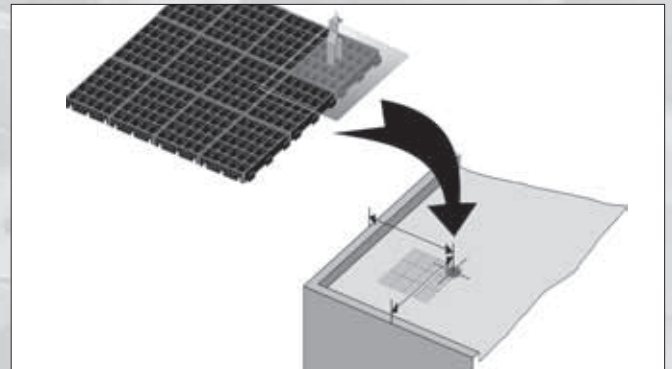

1. Measuring the position of the anchor point

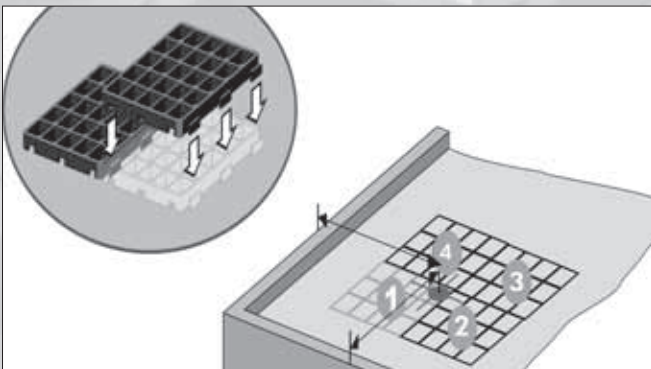

2. Place the marked grid over the anchor point and click into place

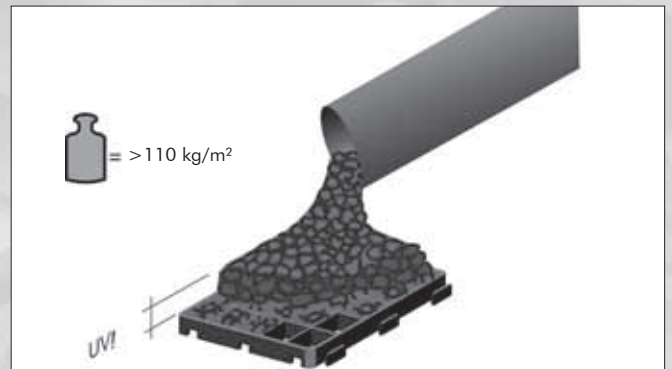

3. The grid must fully cover the base plate and the vertical locking tabs must engage the adjacent elements

4. Positioning the grid and the Anchor Point

5. Connecting the four grids and check the position

6. Applying the required load (min. 110 kg/m²)
